SOFTWARE / WEB DEVELOPER (FRESHER)

Software Developer with hands-on experience building full-stack web applications and machine learning projects. Strong foundation in JavaScript, React, Node.js, and Python with practical exposure to real-world problem solving through hackathons and self-driven projects. Passionate about writing clean code, learning fast, and building scalable applications.

Technical Skills

Languages: Python, Java, C, JavaScript

Frontend: HTML5, CSS3, React

Backend: Node.js, Express.js

Database: MySQL, MongoDB

Tools: Git, GitHub, Linux, Postman, VS Code

Projects

- **Budget Tracker Web Application**

React, Node.js, Express, MongoDB

- Built a full-stack web app to track user income and expenses with category-wise records.
- Implemented user authentication and CRUD operations for transactions.
- Designed responsive UI and REST APIs for smooth data flow between frontend and backend.
- Gained strong understanding of full-stack architecture and state management.

- **ML Mini Project – Decision Tree Model**

Python, Scikit-learn

- Developed a machine learning model using Decision Tree algorithm for prediction tasks.
- Performed data preprocessing, feature selection, and model evaluation.
- Applied supervised learning concepts and model training pipeline.

Hackathon Experience

- **Participant – College Hackathon**

- Collaborated in a team to design and build a working software prototype under time constraints.
- Learned practical skills in problem-solving, teamwork, rapid development, and presentation.
- Gained exposure to real-world development workflow and idea validation.

Education

- **B.Tech in Computer Science Engineering** — College Name (2021–2025)

CGPA: X.XX / 10

Key Strengths

Problem Solving, Full-Stack Development, Quick Learner, Team Collaboration, Debugging & Testing
